MUTHUVEL M

Full Stack & AI Developer | Angular | Next.js | NestJS | MySQL

Chennai, Tamil Nadu | +91-8668008395 | muthuvel638381@gmail.com | linkedin.com/in/muthuvel-m-53bb4b25a

PROFESSIONAL SUMMARY

Full Stack & AI Developer with 2+ years of experience building scalable enterprise applications using Angular, Next.js, NestJS, and MySQL. Skilled in developing high-performance REST APIs, optimizing database queries, and integrating cloud-based storage solutions. Experienced in AI API integration and delivering production-ready financial modules with zero critical defects.

CORE TECHNICAL SKILLS

Frontend: Angular, Next.js, TypeScript, PrimeNG, HTML5, CSS3, Tailwind CSS
Backend: Node.js, NestJS, PHP, REST APIs, JWT Authentication
Database: MySQL, MariaDB, PostgreSQL (Joins, Indexing, Optimization)
Cloud & Development: Supabase, Cloudinary, MinIO, Vercel
AI & Tools: AI API Integration, Prompt Engineering, AI-assisted Development
Dev Tools: Git, GitHub

PROFESSIONAL EXPERIENCE

Software Developer – Finstein

Chennai, Tamil Nadu | June 2023 – Present

- Developed 5+ enterprise financial modules including Chit Transfer, Vendor Management, and Inter-Bank Transfer using Angular and NestJS
- Designed and implemented scalable REST APIs for financial transaction processing
- Optimized MySQL queries using joins and indexing, improving performance by 30–40%
- Built reusable Angular components, reducing development time by 25%
- Integrated Supabase for database and storage management
- Implemented cloud-based file handling using Cloudinary
- Applied AI-assisted development techniques for debugging and productivity improvement
- Implemented JWT-based authentication and role-based access control (RBAC)
- Delivered production-ready applications with zero critical defects

PROJECTS

AI-Powered PDF Data Extractor

- Built a system to extract structured data from PDFs using AI-based processing
- Implemented logic to detect text-based vs scanned PDFs with fallback handling
- Integrated backend APIs for validation and processing

Admin Panel & Website (Next.js + Supabase + Cloudinary)

- Developed a full-stack admin dashboard with authentication and CRUD operations
- Integrated Supabase for database and storage management
- Implemented image upload and optimization using Cloudinary

Bank Reconciliation System (Angular + NestJS)

- Developed financial reconciliation module with transaction matching and reporting
- Improved backend performance using optimized SQL queries

Birthday Wishes Notification System (PHP + Google Apps Script)

- Built an automated birthday wishes system using PHP and Google Apps Script
- Integrated Google Apps Script to trigger scheduled email/notification delivery on birthdays
- Implemented notification logic to automatically send personalized wishes to recipients

---

KEY ACHIEVEMENTS

- Delivered multiple enterprise modules with zero critical production defects
- Improved testing efficiency by 35% through structured testing approach
- Reduced development time by building reusable Angular and Node.js components
- Successfully handled end-to-end module development (UI, API, Database)

EDUCATION

Bachelor of Computer Applications (BCA) – Madras University, Chennai (Pursuing)

Diploma in Computer Engineering – Ramakrishna Mission Polytechnic College, Chennai
May 2023 | Passed with Distinction (88%)
